## COMMERCIAL & INDUSTRIAL ELECTRICAL CONTRACTOR

- Aggregate Bonding to \$2 Million Dollars
- Experienced with local, state, and federal government contracting
- Small Business – SBA Certified
- HUBZone Contractor
- Registered in SAMS

Our company offers a full line of commercial, industrial, institutional, and residential electrical contracting services within the state of West Virginia. The owners and employees of Master Service have over 40 years' experience in the electrical contracting field. We are centrally located in Elkins, West Virginia and provide high quality service throughout the state.

We offer project design, procurement, and installation services for all your electrical needs. The owners and employees of Master Service Corporation have completed projects with the General Services Administration (GSA), WV Army National Guard, WV Air National Guard, Veterans Administration, the State of West Virginia, the USDA, and many other government and public entities.

MSC can provide engineering services to create electrical drawings and specifications for a wide range of projects. Our staff can identify, quote, and ship material and tools required for complete installations upon reviewing plans and specifications.

We are capable of design and installation of emergency generation systems. Our staff has the expertise and resources to provide emergency power restoration and permanent repairs in almost any instance. We have access to and can provide electrical materials for your business which include but are not limited to:

- Conduit, Raceway, Fittings, Boxes, etc.
- Switchgear, Panel Boards, Disconnects, Circuit Breakers, etc.
- Wire – High Voltage, Medium Voltage, Low Voltage, and Control Cables
- Light Fixtures and Lamps
- Wiring Devices – Switches, Receptacles, Plates, and Occupancy Sensors
- Life Safety Systems – Fire Alarm, Nurse Call, Security, Sound/Intercom/Paging, Lighting Protection, etc.
- Uninterrupted Power Supply Systems – Generators, Transfer Switches, UPS, TV's, etc.
- Tools and Equipment – Power and Hand Tools, Large Pipe/Conduit Bending/Threading/Equipment, Cable Pulling Equipment, Test Equipment, etc.
- We can provide tool and equipment kits from personal tool belts to outfitting the largest construction projects.

## Company Philosophy:

We feel that the most important service a company can provide is top quality customer service. As with any business how quickly and accurately you respond to a customer's request defines your relationship with that customer.

In addition to response time, we know that it is necessary to establish strong relationships with customers and general contractors. As with every relationship, trust and honesty are the key factors to maintaining a strong bond and we value these principles above all.

We also recognize that having hand-picked, well trained employees are an essential ingredient in a successful business. We hire only the highest skilled professionals and demand our employees maintain our high level of customer service. We know that to maintain these skilled professionals and a positive customer service attitude that it is imperative that we provide our employees with top level pay and benefits. We continuously look for opportunities to improve our company as an employer. We understand that a happy employee is one that is willing to go the extra mile for us and our customers. Our goal as a company is that our staff and customers feel as though they are an integral part of our team.
